## Magic Number Mystery

### MAGIC NUMBER MYSTERY

Hand the seven magic number cards to someone. Tell him to think of any number between 1 and 100. Now have him hand you each card on which his number is printed. You will easily be able to tell him what number he picked.

The secret is that you simply add up the first numbers of each card he hands to you (Fig. 1). This works every time, and can be a good way to guess someone's age.

**Photocopy and cut out the seven different cards, and put them together.**
